MEDIA RELEASE
JULY 2007

NEW LARGE FORMAT PAVER

In response to demand from designers and consumers for larger format pavers, C&M have recently introduced Limestone Grande to their premium Atenstone® paving range.

Limestone Grande measures 600 x 400 x 40mm and has a slightly 'aged' surface texture to closely resemble real limestone yet provides the strength and durability required of a modern concrete paver.

Limestone Grande® is available in a range of neutral colours that have been carefully blended to reflect the tones found in real limestone.

Limestone Grande is shown here in Honeycomb Blend

There is a matching bullnose paver for use as pool edging, on step treads or to cap walls. The surface texture of the Limestone Grande paver is continued around the curved bullnose.
